

### **IN THE SPECIFICATION**

Please make the paragraph substitutions indicated below. The specific changes incorporated in the substitute paragraphs are shown in the following marked-up versions of the original paragraphs.

The paragraph beginning on page 1, line 5 is amended as follows:

This application is related to co-pending application serial number 09/745,323, now U.S. Pat. No. 6,938,005, titled "Digital Content Distribution," filed on December 21, 2000, which is commonly assigned to the assignee of the present application.

The paragraph beginning on page 7, line 1 (middle of page) is amended as follows:

As shown in Figure 1, the invention may also be embodied as a digital content pricing system 140, which includes a sales computer[[;]] 104, and a purchase computer 144 capable of being communicatively coupled with the sales computer. The coupling medium may be wireless (using electromagnetic energy), wired, fiber optic, or combinations thereof. The system 140 also include a memory 108, 108' capable of being communicatively coupled with the sales computer. The memory 108, 108' may operate as described above, so as to include one or more digital content items associated with a base price, one or more item configuration options associated with one or more option prices, and a final price (and/or item price) related to the base price and the option price(s) by a final pricing formula.

The paragraph beginning on page 7, line 11 is amended as follows:

The purchase computer 144 may be communicatively coupled to an item selection device, such as a keypad, mouse, touch screen, or any other input device, including a microphone or video camera, which is capable of receiving item selection input from a user. The computer 144 may also include a display 156, specifically used to confirm purchase selections, including the types and quantities of items selected, the options selected, and results of pricing formula calculations applied to the purchase decision.
